The screenshot shows the phpMyAdmin interface for the database 'webdb'. The left sidebar lists databases: information\_schema, mysql, performance\_schema, phpmyadmin, test, webdb, and a local 'Nuova' database. The 'users' table under 'webdb' is selected. The main area displays the table structure with columns: id, username, and password. Data rows are shown with actions: Modifica (Edit), Copia (Copy), Elimina (Delete). The last row, with id 7 and values 'rootjiji' and '111222', has its 'Elimina' button highlighted. Below the table are buttons for Selezione tutto (Select all), Se selezionati: (Selected), and various export options like Modifica, Copia, Elimina, and Esporta. At the bottom, there are sections for Operazioni sui risultati della query (Operations on the query results) with options like Visualizza per stampa (View for print), Esporta (Export), Mostra diagramma (Show diagram), and Crea vista (Create view). There's also an 'Aggiungi ai preferiti questa query SQL' (Add this SQL query to bookmarks) section with an Etichetta (Label) input field and a checkbox for Permetti ad ogni utente di accedere a questo bookmark (Allow any user to access this bookmark). The bottom navigation bar includes links to OBS-Studio, amazing-astronom...jpg, BACkgr.png, and another amazing-astronom...jpg, along with a search bar and system icons.
